# MATTHEW SANDOVAL

## WEB DEVELOPER

Web Developer with a passion for problem solving. Experience in thoughtfully writing JavaScript, React.JS and Svelte.JS on the front end, Node.JS, Express and Mongoose on the back end.

matthewsandoval.com          mat24c@gmail.com          (626)536-8057

## EXPERIENCE

**Apr. 2020-May2020**

### Full Stack Shopping List

Built using the MERN stack, this app has user accounts and the ability to share shopping lists with other users. All data is stored and accessed using MongoDB. The app uses JWT tokens to keep users logged in for a set amount of time.

**Nov. 2019-Dec. 2019**

### ascrapguy.com

Built using Svelte.JS on the front end and Firebase Realtime database to save and access the data displayed to the site. This site is built to allow the client the ability to quick and easily change item names and prices from the admin page.

**Oct. 2019-Nov. 2019**

### yourdensityaltitude.com

Built using Svelte.Js and multiple APIs to get the geolocation, elevation and weather from the user, in order to calculate the users density altitude by using the FAA recommended formula.

## SKILLS

-HTML5
